

E-Scooter Shared Points

This dataset provides details about the location, characteristics, and availability of each soft mobility parking spot, including its name, identification, status, type, signals, number of places, and geographic coordinates.

Each row represents a specific location and includes attributes such as *"toponimo"*, *"n_id"*, *"estado"*, *"tipo_estac"*, *"sinal_vert"*, *"sinal_info_vert"*, *"n_lugares"*, *"pictograma"*, *"objectid"*, *"globalid"*, *"x"*, *"y"*, *"geometry"*, and *"name_id"*.

It can be useful for various applications such as urban planning and transportation analysis.

Data Dictionary

Name	Description	Type	Default	Max. Length	Example
toponimo	The name of the location or street	VARCHAR	NULL		Avenida da Boavista
n_id	Numeric identifier associated with the location	INTEGER	NULL		183
estado	Indicates the status of the location	VARCHAR	NULL		Ativo
